

JOHN FRANCIS B. CANAPATI

Olongapo City, Zambales | +639949057375 | jf.canapati@gmail.com | <https://jfcanapati.vercel.app> | <https://github.com/jf-canapati>

PROFESSIONAL SUMMARY

BSIT graduate (Dean's Lister; Best in Capstone) with a practical, systems-first mindset and a strong bias for building clear, maintainable solutions. I'm known for learning quickly, communicating well with both technical and non-technical teammates, and iterating fast based on feedback while keeping quality and usability in focus.

TECHNICAL SKILLS

Scripting/Languages:	Javascript, Typescript, Python, Java, C++
Frontend/UI:	HTML5, CSS3, React, Next.js, Tailwind CSS
Backend & Systems:	PHP, Node.js, Express.js, MySQL, Firebase, RESTful API, Composer
Tools & Platforms:	Git, Github, Figma, Expo, Lovable, V0, Claude, ChatGPT, Cursor, Github Copilot
Deployment Tools:	Vercel, Render, Hostinger
Troubleshooting Tools:	Chrome DevTools, CLI Debugger
Other Skills:	Microsoft Office (Documentation), Draw.io (system flowchart, diagramming, charts), Canva (Assets)

RELEVANT EXPERIENCE

Fullstack ERP System Developer (Internship)

April 2025 – March 2026

David's Salon Salon – Ayala Malls Harborpoint

- Engineered a scalable web and mobile application supporting 15+ staff across 7 branches for appointment scheduling, CRM, and inventory
- Implemented backend APIs and database tables/queries to ensure reliable data flow, validation, and consistency across core modules.
- Collaborated with stakeholders to gather requirements, translate processes into system features, and deliver iterative improvements based on user feedback and testing.
- Deployed and maintained the system using **Vercel**, managing environment variables, production builds, and iterative updates; troubleshoot deployment/build issues to keep releases stable.

TECHNICAL PROJECTS

COPit: A Competitive ThriftShopping Mobile App (2nd RU Hackathon & Best Presenter)

- Built a cross-platform mobile marketplace for thrift items featuring **Mine–Steal–Lock** gameplay mechanics and a real-time **bidding** flow to drive user engagement.
- Implemented Mine (base price), Steal (outbid takeover), and Lock (highest bid wins when the timer ends) item flows.
- Designed the app UI/UX and integrated backend services for data persistence and notifications to support time-sensitive steals/locks and bid updates.

David's Salon ERP Management System

- Built a cloud-based, multi-branch salon management system to centralize day-to-day operations across locations (appointment, inventory, customer relationship, and reporting).
- Implemented role-based access for system admins, owners, managers, receptionists, inventory staff, stylists, and clients.
- Built a working optional AI-driven kiosk (proof of concept) that recommends hairstyles based on client facial features/structure.

SVMS: Lyceum of Subic Bay Student Violation Management System

- Built a web-based PWA Student Violation Management System to manage discipline records, violation reports, and disciplinary actions.
- Enabled QR code-based student identification and role-based access for admins, discipline officers, teachers, and students.
- Improved reporting and retrieval of discipline data to reduce paperwork and speed up follow-ups.

EDUCATION

Lyceum of Subic Bay (LSB)

Olongapo City, Philippines

Bachelor of Science in Information Technology | September 2022 – April 2026

- Consistent Dean's Lister (AY 2022–2025) | GPA: 1.34
- Scholarship: Mito Magsaysay Scholarship Grantee
- Relevant Courses: Web Development, Application Development, API Integration, UI/UX Designing, Database Management System.
- Awards: Best in Capstone Project, Best Capstone Project Presenter, Hackathon Placer/Participant

CERTIFICATIONS

- Skydev.Solutions: 2nd Runne Up "Automate the Future: A Hackathon for innovators (2025)
- Cisco: Networking Basics (2026)
- Cisco: Introduction to Cybersecurity (2026)
